Education

University of Verona

Verona, Italy

Master's Degree in Computer Engineering (ongoing)

Sep/25 – Jul/27 (expected) · GPA 27/30

- **Relevant Coursework:** Cryptography, Network Security, Malicious Code, Cybersecurity, Software Security.
- **Graduation project (Master's thesis)**, full-time **March – June 2027**: **CRA** (Cyber Resilience Act) and **RED** (Radio Equipment Directive) compliance for embedded devices, with a **focus** on cryptographic mechanisms and security protocols underlying compliance requirements.

University of Verona

Verona, Italy

Bachelor's Degree in Computer Science

Sep/20 – Sep/25 · GPA 23/30

- **Thesis:** First hands-on experience with full-stack web development, optimizing network traffic by splitting the app into microservices behind a reverse proxy.

Work Experience

Edalab

Verona, Italy

Firmware Developer

Mar/26 – Present

- Developed firmware for custom boards, working from specifications and schematics defined together with the client.
- Currently developing firmware for a CO2 heat-pump water-tank heating system; built a HIL simulator that injects data over dual serial and emulates the hydraulic circuit and a Modbus inverter/compressor.
- Other projects: MQTT/BLE pressure inverter controller, vending machine with spiral dispensers, and bootloader-based updates with CAN master↔slave debugging (ST-Link + CAN-FD).

VT100 S.r.l.

Verona, Italy

Software Development / IoT Internship

Oct/25 – Jan/26

- Built an **automatic provisioning system** that gives each board its own identity: a MAC from a managed pool and an MQTT identity — credentials or an **X.509 client certificate** from a local **CA**.
- Two enrolment flows (username/password and **mutual TLS**): boards ship with a shared factory identity and swap it on first boot for a unique, revocable one. Next.js console, EMQX and MySQL in Docker.

Lifeguard

Lazise & Verona, Italy

May/23 – May/24 · Jun/26 – Aug/26

- Responsible for the safety of hundreds of swimmers at high-traffic tourist and sports facilities.

Skills

- **Languages:** Italian (native), English (proficient), German (basic).
- **Firmware Skills:** FreeRTOS, ESP32, STM32, Renesas MCUs, ESP-IDF, communication protocols (USB, CAN, BLE, UART, Modbus, custom protocols), bootloaders, hardware bring-up (wiring, multimeter/oscilloscope, real-time serial monitoring), debuggers (J-Link/Ozone, ST-Link), soldering (basic level).
- **Firmware Security:** Secure Boot, Flash Encryption, Secure OTA, key management and exchange protocols.
- **Programming Languages:** C, Python and Bash scripting (daily); C++, Rust and Assembly (working knowledge); TypeScript, SQL, HTML/CSS.
- **Tools and Frameworks:** Next.js, Prisma, Docker, Git, React.js, Postman, Mqtt, Wireshark.

Activities & Interests

Activities: Played the piano for the last 15 years, currently recording a rock album in a studio. I also help organize a few jazz events a year in Verona.

Interests: Gym, swimming and experimenting with new ideas and technologies for personal projects.
